SCHOOLING IN MALTA

Schooling in Malta is compulsory from the age of five, although free-of-charge kindergarten is available to all children beginning at age three, if both parents work. School transportation is free for state school students using the nation's bus network.

A normal school day starts at 8:30 am and finish at 2:30 pm, depending on the level. State schools provide textbooks free of charge to their students, while private schools generally require their students to pay for their textbooks.

The state schools here and some of the private schools require school uniform and the classes are quite small in size. There might also be some other traditions that the children might not be used to, such as Morning Prayer and many public holidays/traditional feasts.

For private schools you can make an appointment to have a tour at the school with a senior teacher who should be more than happy to answer all of your questions.

Malta's school system offers both public and private schools. The schools that most foreign employees often choose are private ones and you can find a list below:
